COMPANY PROFILE

PRIVATE PROTOCOL REPRESENTS AND DISTRIBUTES THE "BEST-OF-BREED" DATA PROTECTION SOLUTIONS FOR AFRICA AND INDIAN OCEAN ISLANDS.

With the ever increasing need for companies to adhere to both local and international data security legislation which require all confidential data to be protected at all times, Private Protocol has sourced solutions that primarily focus on protecting unstructured electronic data across multiple environments and systems. Organizations soon discover that data security is a journey and should be addressed in stages, it also forces companies to clean up their data environment resulting in the right data being used by the right people and making sharing of information easier and secure.

PRIVATE PROTOCOL also offers consulting and technical services to both customers and resellers in order to make sure that all product deployments are conducted correctly.

PRIVATE PROTOCOL delivers a cutting edge data protection strategy using leading products and professional services to deliver this strategy.

PRIVATE PROTOCOL provides data protection solutions and services aimed at unstructured data, to companies who believe it is important to protect and secure their data from business risks, to meet legal and compliance requirements and, to ensure that productivity levels are not affected. Our solutions and services cover critical environments.
